GYRATION® ULTRA

CORDLESS OPTICAL SUITE

BREAKTHROUGH
PERFORMANCE!

ON THE DESKTOP, IN THE AIR . . . ANYWHERE!

((())) HIGHEST RADIO POWER MEANS BEST TRACKING & RESPONSE

Gyratation's high power radio transmits data up to 160% faster than other cordless mice. You'll feel the benefits of smoother tracking, more precise cursor movement and faster response.

OVER 4 TIMES THE RANGE FOR MOBILITY AND FREEDOM

Gyratation frees you from the confines of your desktop. Other mice become unstable at 1.5m or less. Gyratation's powerful 8m radio gives the freedom to move away from your desk without sacrificing precise and reliable cursor control.

NEVER BUY MOUSE BATTERIES AGAIN

Other cordless mice require you to purchase and replace batteries frequently. Gyratation uses high performance NiMH rechargeable batteries for long life and no memory effect. Your mouse will always be ready for action!

GYROPOINT POWER™ PUTS YOU IN COMFORTABLE CONTROL

Sit back and relax! Gyratation's patented GyroPoint® technology allows you to mouse around using natural hand movements. Alternate between desktop and in-air use to reduce fatigue and discomfort associated with repetitive motion.

SPACE SAVING FLEXIBILITY IN A SUPERIOR KEYBOARD

Gyratation's small and ultralight keyboard reduces desktop clutter and maximises your workspace. Its high-power radio and 8m range allow you to lean back, drop it in your lap and compute from anywhere in the room.

GYRATION QUALITY YOU CAN FEEL WITH THE TOUCH OF A KEY

Gyratation keyboards use high-quality scissors style keys for a feel far superior to the plunger type keys found on most other keyboards.

MULTIMEDIA & INTERNET CONTROL IS AT YOUR FINGERTIPS

Check your e-mail, browse your favourites and control your CDs and MP3s with the touch of a button. 15 convenient hot keys allow you to control your favourite applications without reaching for your mouse.

	Gyratation	Logitech*	Microsoft*
Data transfer rate	80hz	50hz	30hz
